

Brünnen Street in Bern (CH)

The building envelope of the residential complex was totally refurbished with penthouse apartments. The property rated with an energy efficiency label AA+ generates electricity and hot water via PV modules on the roof, on balcony parapets as well as two SKALA solar facades.

 **3.1 MWh**
Energy yield per year

 **40 kg/year**
CO₂ savings based on country-specific emission factors, determined in 2020

 **SKALA Bronze, Green, Dark Blue**
